The MAILING DATE of this communication app Period for Reply	pears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status	•	•				
1)⊠ Responsive to communication(s) filed on <u>05 M</u>	lav 2005.					
	action is non-final.

Art Unit: 2856

DETAILED ACTION

Specification

- 1. The disclosure is objected to because of the following informalities.
- a. The various section headers; e.g., the Background of the Invention, the Summary of the Invention, etc., are missing. The applicant is requested to amend the specification to include the appropriate headers.
- b. On several occasions the phrase "spring factor" is used. It is requested that the applicant amend the specification to replace this phrase with --spring constant-- as this is a more commonly used term of art.
- c. On page 3 the specification refers to the reference item number 7 as being the tips. Since the tips are not shown the applicant should amend the specification to delete the reference item number.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Line two of claim 4 limits the apparatus to resilient members that are different. The term "different" of "difference" is open-ended in that the claim covers any and all differences, including differences not contemplated by the applicant. Examples of this could be resilient members having different color, being formed of different

Art Unit: 2856

materials and having different dimensions but still having the same spring constant, having different serial numbers, having different lot numbers, etc. It is suggested that the applicant replace the phrase "are different" with "have different spring constants" in order to correctly claim the invention.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent 5,013,529 to Itoh.

Itoh discloses a multichannel pipette as seen in figure 5. Each pipette channel comprises a cylindrical member (reference item 93) that is analogous to the applicant's suction tube. A disposable tip (reference item 3) is attached to the cylindrical member as seen in figure 7. During the tip attaching phase the cylindrical member is adapted to move in a vertical direction as is biased in that direction by a spring (reference item 94). The apparatus shown in figure 7 inherently has an outermost position and an innermost position, and the movement of the cylindrical member will be between these positions.

With regard to claim 3 Itoh is silent as to whether or not the springs for each channel are similar or different. However, the springs have to be either all the same or at least one is different. It is presumed that they are all similar since the device appears to use the same tips for each channel for any given pipetting operation.

Application/Control Number: 10/533,882 Page 4

Art Unit: 2856

Allowable Subject Matter

6. Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35

U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the

limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from

the examiner should be directed to David A. Rogers whose telephone number is (571)

272-2205. The examiner can normally be reached on Monday - Friday (0730 - 1600).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Hezron E. Williams can be reached on (571) 272-2208. The fax phone

number for the organization where this application or proceeding is assigned is 571-

273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR

only. For more information about the PAIR system, see http://pair-direct.uspto.gov.

Should you have questions on access to the Private PAIR system, contact the

Electronic Business Center (EBC) at 866-217-9197 (toll-free).
